Did you know?

Your cellular service is impacted by more than just your carrier and cell phone.

6

Things that may be causing poor cell signal, and how you may (or may not) be able to fix it...

★ Your Distance From a Cell Tower

Depending on whether your phone is searching for 5G or 4G, makes a big difference, from in the thousands of feet from a small cell tower to tens of miles to larger carrier towers.

★ Your Terrain

Radio waves travel in a straight line from a tower to a cell phone and back. If the landscape, other buildings, or even dense foliage blocks the signal, you may see poor signal.

★ Being Inside a Building

Fixable!

Building materials including concrete, steel, high efficiency glass, and more are great at blocking cell signals. If you have signal outside, but not inside, a booster system will help deliver better quality service indoors.

★ The Weather

Particles in the atmosphere, including rain and dust, can interfere with your cell signal traveling from nearby towers.

★ Other Users on the Network

Fixable!

Networks can slow down as more users are added and there are not enough towers available in an area. Private networks can be built for organizations needing a more stable network.

★ You're on the Go

Fixable!

If you spend a lot of time on the road, your service may be impacted the speed you drive or the steel of your car. Mobile cellular boosting solutions may help keep you talking on the go.

About Us

Wytec is a Texas based company set on a mission to advance the critical needs of America's telecommunications using all the tools available, including the latest in Artificial Intelligence and Blockchain technology to make America safer and more prosperous.

Protecting children at school is why we come to work every day, but we happily serve clients in all industries with solutions that provide better cellular and wireless communications for both indoor and outdoor connectivity.

Our Services

☑ DAS & HYBRID SYSTEMS

Improve your current cellular service in your facilities with indoor or outdoor DAS or Hybrid solutions. We can work with carriers or provide carrier agnostic solutions.

☑ WI-FI

We provide wireless networks for your organization - suited to your needs, large and small.

☑ PRIVATE LTE

Wytec can provide organization wide private networks, which allow you to have a secure, more dependable network. Ask about our school district to city-wide coverage rollout plans.

☑ ACTIVE SHOOTER DETECTION

We work with your team to deliver an active shooter solution to meet your needs and protect your people.

Pick Your Pricing

Unit Pricing

Unit Pricing offers clients a detailed list of Product and Service pricing on a per unit basis and are a good fit for smaller projects.

We work with premier distributors of worldclass products to deliver only the best solutions.

Available Solutions

- Professional Wi-Fi Installation
- Cellular Booster Installations
- Bus/Vehicle GPS and Video Solutions
